AP CALCULUS AB

Unit 1 • Lesson 1.9 practice

Lesson 1.9 • Connecting Multiple Representations of Limits

4 multiple-choice questions and 1 free-response question

The graph of f: a line segment for $-3 \le x < -1$, $y = x^2$ for $-1 \le x < 2$, a line segment for $2 < x \le 4$; $f(-1) = 1$, $f(2) = 1$.

Question 1

Let $g(x) = x + 1$. Using the graph of f, what is $\lim_{x \to 2} f(x)g(x)$?

(A) 3

(B) 4

(C) 12

(D) 7

Question 2

With $g(x) = x + 1$, what is $\lim_{x \to 2} \big(f(x) - g(x)\big)$?

(A) 1

(B) -2

(C) -1

(D) 7

Question 3

A function h has values 4.9, 4.99, 4.999, 5.001, 5.01, 5.1 at $x = 0.9, 0.99, 0.999, 1.001, 1.01, 1.1$. Let $k(x) = 2x$. What is $\lim_{x \to 1} \dfrac{h(x)}{k(x)}$?

(A) 5

(B) $\dfrac{5}{2}$

(C) 10

(D) $\dfrac{2}{5}$

Question 4

With $g(x) = x + 1$, what is $\lim_{x \to 3} g\big(f(x)\big)$?

(A) 4

(B) 2

(C) 5

(D) 3

Question 5 (Free response)

Use the graph of f above. The function g is defined for all x, and $g(1.9) = -1.2$, $g(1.99) = -1.02$, $g(1.999) = -1.002$, $g(2.001) = -0.998$, $g(2.01) = -0.98$, $g(2.1) = -0.8$.

(a) Assuming the table shows the trend of g, find $\lim_{x \to 2} \big(f(x) + g(x)\big)$.

(b) Find $\lim_{x \to 2} f(x)g(x)$ and $\lim_{x \to 2} \dfrac{f(x)}{g(x)}$.

(c) Find $\lim_{x \to -1^+} \big(f(x) + x\big)$ and $\lim_{x \to -1^-} \big(f(x) + x\big)$.
